

FIRST ANNOUNCEMENT

ASTARTE & PEARL Joint Summer School

Coastlines are more and more vulnerable to extreme events because of growing population, climate change, rapid urbanization and economic interests. From June 3 until June 7, 2016, young professionals are invited to come to Greece to discuss most relevant topics on extreme coastal hazards with internationally renowned scientists in the ASTARTE & PEARL Joint Summer School.

Field trips to Phalasarna and Rethymno

More information coming soon.

3-7 June 2016

Technical University of Crete
