# ASTARTE - PEARL - TANDEM Joint Summer School

Coastlines are more and more vulnerable to extreme events because of growing population, climate change, rapid urbanization and economic interests. From June 3 until June 7, 2016, young professionals are invited to come to Greece to discuss most relevant topics on extreme coastal hazards with internationally renowned scientists in the ASTARTE, PEARL & TANDEM Joint Summer School.

**Field trips to Phalasarna and Rethymno**

**3-7 June 2016**

**Technical University of Crete**

**Chania 731 00, Greece**

More information coming soon.
